

REMARKS

In the May 20, 2005 office action, the Examiner asserted that the oath or declaration was defective, on grounds that "Applicant #2 and #3 have not signed the Oath.

In addition, claims 1-20 were rejected under 35 USC 112, first paragraph, as failing to comply with the written description requirement. Specifically, the Examiner asserted that "the specification does not (sic) clear support or detail how the speakers are disposed within on in the window. Clarification and correction are required."

Signed Oath or Declaration

Applicants traverse the Examiner's assertion that all required Oaths/Declarations have not been submitted.

Attached as "Attachment A" is a copy of the signed "Combined Declaration and Power of Attorney" of inventors James Libby and Kurt Heikkla ("Applicant #2 and #3"). The first page of this document identifies the present application by application number and filing date, and the last page of this document bears the signatures of the two inventors in question (and also names the third inventor, Russell Pylkki).

This Combined Dec/POA was one of two submitted in September 2002 (along with other papers) as part of a Response to Notice to File Missing Parts mailed March 7, 2002. A copy of the USPTO-stamped postcard evidencing receipt of the Response to Notice to File Missing Parts is attached as "Attachment B".

In view of the foregoing, it is respectfully submitted that the oath/declaration requirements have been met and that this objection should be withdrawn.

Rejection under 35 USC 112, 1st ¶

Applicants traverse the Examiner's assertion that the invention is not enabled.

In rejecting the claims on these grounds, the Examiner stated that "the specification does not (sic) clear support or detail how the speakers are disposed within or in the window." It is respectfully submitted, however, that one skilled the art would readily understand this. The specification, at page 4, line 14, states that "The speaker element 190 can be located on or in the

window 130, 135.” This is believed to be sufficient support for the claim language because devices which allow a window, display screen, glass pane of a picture, and the like, to act as a speaker are well-known in the prior art. Examples of such systems can be found in U.S. Patent Nos. 5,400,414, 6,332,029, 6,389,935, and WIPO Publication nos. WO 00/02417 and WO 00/35242. Furthermore, prior art references such as U.S. Patent Nos. 6,151,402 and 6,192,136¹ disclose vibration transducers that can create such effects, when coupled to a window or the like.

In view of the foregoing, it is submitted that the rejection under 35 USC 112, 1st ¶, should also be withdrawn.

Reconsideration of the application is requested. Claims 1-20 are believed to be in allowable form and define over the prior art. An early notice of allowance is requested so that the application may proceed to issue. Should the Examiner have any questions or comments regarding the foregoing Amendment and response, he is invited and urged to telephone the undersigned attorney.

The Commissioner is hereby authorized to charge any additional fees that may be required for the timely consideration of this Amendment under 37 C.F.R. §§ 1.16 and 1.17, or credit any overpayment to Deposit Account No. 09-0528.

Respectfully Submitted,

I hereby claim the benefit under Title 35, United States Code § 119(e) of any United States provisional application(s) listed below:

U.S. PROVISIONAL APPLICATION NUMBER	DATE OF FILING (Day, Month, Year)

I acknowledge the duty to disclose information that is material to the patentability of this application in accordance with Title 37, Code of Federal Regulations, § 1.56 (reprinted below):

§ 1.56 Duty to disclose information material to patentability.

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is canceled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is canceled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine:

- (1) prior art cited in search reports of a foreign patent office in a counterpart application, and
 - (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.
- (b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and
- (1) It establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or
 - (2) It refutes, or is inconsistent with, a position the applicant takes in:
 - (i) Opposing an argument of unpatentability relied on by the Office, or
 - (ii) Asserting an argument of patentability.

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

- (c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are:
- (1) Each inventor named in the application;
 - (2) Each attorney or agent who prepares or prosecutes the application; and
 - (3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application.
- (d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor.
- (e) In any continuation-in-part application, the duty under this section includes the duty to disclose to the Office all information known to the person to be material to patentability, as defined in paragraph (b) of this section, which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.

I hereby appoint the following attorney(s) and/or patent agent(s) to prosecute this application and to transact all business in the Patent and Trademark Office connected herewith:
